[Kawasaki Xi 750 Manual](#)

FUEL SYSTEM 2-7

Throttle Cable

Throttle Cable Adjustment

- Check throttle cable adjustment.
- With the throttle lever released, the lower stop on the throttle pivot arm [A] should rest against the idle adjust screw [B], and there should be slight slack in the throttle cable.
- When the throttle lever is fully applied (pulled), the upper stop on the pivot arm should be all the way up against the stop on the carburetor.

- If necessary, adjust the throttle cable [A].
- Loosen and turn the locknuts [B] at the cable holder until the lower stop on the pivot arm hits against the idle adjust screw with slight cable slack.
- Tighten the locknuts securely.

Throttle Case and Cable Removal

- Disconnect the throttle cable from carburetor.
- Remove:
 - Handlebar Pad
 - Throttle Case Mounting Screws [A]
 - Start/Stop Switch
 - Handlebar
 - Steering Cover
- Disconnect the throttle cable from case.
- Use a screw driver [A] to separate the tip of the cable end [B] from the case body.
- Take out the bolts [A] and remove the grommet [B].
- Remove the throttle cable by carefully pulling the cable through the hull.
